

TaskApi

프로젝트 등록

- request

post /api/project/register

```
{
  "name" : "",
  "adminId" : ""
}
```

- response

```
{
  "id" : ""
}
```

프로젝트 task 조회 (프로젝트 클릭했을 때 관련 task 조회)

- request

get /api/project/{projectId}

- response

```
[
  {
    "id" : "",
    "name" : "",
  },
  {
    "id" : "",
    "name" : "",
  }
]
```

유저가 속한 프로젝트 전체 조회

- request

get /api/projects/{userId}

- response

```
[
  {
    "id" : "",
    "name" : "",
  },
  {
    "id" : "",
    "name" : "",
  }
]
```

프로젝트 수정폼

- request

get /api/project/edit/{projectId}

- response

```
{
  "name" : "",
  "status" : ""
}
```

프로젝트 수정

- request

post /api/project/edit/{projectId}

```
{
  "name" : "",
  "status" : ""    (ACTIVE, INACTIVE, TERMINATION 중 1개)
}
```

- response

HttpStatus.OK

<Response body is empty>

프로젝트 삭제

- request

DELETE /api/project/{projectId}

- response

HttpStatus.OK

<Response body is empty>

프로젝트에 멤버 추가

- request

post /api/project/{projectId}/addMember/{memberId}

- response

HttpStatus.OK

<Response body is empty>

task 등록

- request

post /api/task/register

```
{
  "name" : "",
  "content" : "",
  "userId" : "",
  "projectId" : ""
  "tag" : [
```

```

        {
            "id" : "",
            "name" : ""
        },
        {
            "id" : "",
            "name" : ""
        }
    ],
    "milestone" : {
        "id" : "",
        "status" : ""
    }
}

```

- response

```

{
    "id" : ""
}

```

task 조회(task 클릭시 조회)

- request

GET /api/task/{taskId}

- response

```

{
    "name" : "",
    "content" : "",
    "userId" : "",
    "projectId" : "",
    "tag" : [
        {
            "id" : "",
            "name" : ""
        },
        {
            "id" : "",
            "name" : ""
        }
    ]
}

```

```

    },
    "milestone" : {
        "id" : "",
        "status" : ""
    },
    "comment" : [
        {
            "id" : "",
            "content" : ""
        }
    ]
}

```

task 수정폼요청시

- request

get /api/task/edit/{taskId}

- response

```

{
    "name" : "",
    "content" : "",
    "tag" : [
        {
            "id" : "",
            "name" : ""
        },
        {
            "id" : "",
            "name" : ""
        }
    ],
    "milestone" : {
        "id" : "",
        "status" : ""
    },
    "tags" : [
        {
            "id" : "",
            "name" : ""
        },
        {
            "id" : "",
            "name" : ""
        }
    ]
}

```

```

        {
            "id" : "",
            "name" : ""
        }
    ]
    "milestones" : [
        {
            "id" : "",
            "status" : ""
        },
        {
            "id" : "",
            "status" : ""
        }
    ]
}

```

task 수정

- request

post /api/task/edit/{taskId}

```

{
    "name" : "",
    "content" : "",
    "tag" : [
        {
            "id" : "",
            "name" : ""
        },
        {
            "id" : "",
            "name" : ""
        }
    ],
    "milestone" : {
        "id" : "",
        "status" : ""
    }
}

```

- response

HttpStatus.OK

<Response body is empty>

task 삭제

- request

DELETE /api/task/{taskId}

- response

HttpStatus.OK

<Response body is empty>

tag 등록

- request

post /api/tag/register

```
{  
  "name" : "",  
  "projectId" : ""  
}
```

-response

HttpStatus.CREATED

<Response body is empty>

tag 삭제

- request

delete /api/tag/{tagId}

- response

HttpStatus.OK

<Response body is empty>

milestone 등록

- request

post /api/milestone/register

```
{  
  "projectId" : "",  
  "status" : ""  
}
```

- response

HttpStatus.CREATED

<Response body is empty>

milestone 삭제

- request

delete /api/milestone/{milestoneId}

- response

HttpStatus.OK

<Response body is empty>

comment 등록

- request

post /api/comment/register

```
{  
  "taskId" : "",  
  "projectMemberId" : "",  
  "content" : ""  
}
```

- response

HttpStatus.*CREATED*

<Response body is empty>

comment 삭제

- request

delete /api/comment/{commentId}

- response

HttpStatus.*OK*

<Response body is empty>
